EDUCATION

The University of North Carolina at Charlotte	Jan 2025 – Dec 2027
<i>Bachelor of Science, Management Information Systems, Bachelor of Science, Business Analytics</i>	Charlotte, NC
• Minors: Political Science; American Studies • Dean's List (Spring 2026)	
Wake Technical Community College	Jan 2023 – Dec 2024
<i>Associate of Arts, Business Administration</i>	Raleigh, NC

EXPERIENCE

Apple Support College Program Advisor	May 2025 – Present
<i>Apple</i>	Remote
• Resolve technical issues across Apple's hardware, software, and services ecosystem using internal tools and workflows, with an emphasis on first-contact resolution and KPI-driven performance. • Deliver clear, empathetic communication to a diverse customer base while maintaining Apple's standards for confidentiality, service quality, technical accuracy, and user experience.	
Frontend Lead	Feb 2021 – Oct 2023
<i>Invii</i>	Raleigh, NC
• Owned all frontend development for a startup, taking products from first prototype to production. • Built and delivered internal dashboards and user-facing apps in Vue.js, Nuxt, and TailwindCSS, delivering responsive, accessible interfaces across the product line.	
Business Analyst Intern	Jun 2021 – Aug 2021
<i>City of Raleigh Municipal Government</i>	Raleigh, NC
• Conducted market research for Wotter, a venture-backed swimwear brand, identifying where a new product line could fit within their existing lineup. • Established a partnership between a local arts school and Wotter, coordinating student-created artwork to be printed on the new product line.	

PROJECTS

Nocturne	Sep 2024 – Present
<i>Custom Firmware and Companion App Ecosystem for Spotify Car Thing Hardware</i>	
• Led development of Nocturne, an open-source firmware ecosystem with 700+ sponsors and 1,700+ users. • Architected embedded Linux on ARM Cortex-A53 with a Rust daemon, BlueZ, and A/B OTA updates. • Built a touch-optimized React 19 SPA with media controls, media exploration, and hardware integration.	
Bagel Fund	May 2024 – Present
<i>Early-Stage Project Funding Initiative</i>	
• Collaboratively contributed over \$15,000 to support young innovators through team-based funding decisions. • Identified promising project proposals in areas including robotics, AI literacy, and elder care technology. • Provided coaching to help refine concepts, including self-driving RC cars and computer vision applications.	
GeneCodex	May 2023 – Present
<i>In-Browser Bioinformatics Platform</i>	
• Built a client-side platform to process and visualize genetic data entirely in the browser. • Integrated SNPedia data to provide trait analysis for health, appearance, and behavior.
